# Manage Your Assets with Confidence

## Complete Fixed Assets Management

Our Fixed Assets application simplifies your daily processes by giving you total control of managing your assets. Track equipment from the time it arrives at its location, is put into service, and everything in between. Pinpoint equipment locations, manage depreciation, and report information while maintaining compliance.

> " I trust them with everything that I ask them to do. I'd go to bat for PUBLIQ. "

*Happy Customer*
*Cherokee County, SC*

## Create Comprehensive Records

Our software helps you track your assets at every stage of the process and save the details. Maintain through asset records, including purchase and vendor information, service dates, transfers, and disposals with the ability to include images, associate items with grants, and track depreciation.
## Find Information Fast

Organize information and locate it with ease. Classify assets by category and assign tag numbers to identify and retrieve information quickly. Use efficient standardized reports that comply with Governmental Accounting Standards Board® requirements or create custom reports to meet your needs.

# Interfaces & Integration

**Seamless Software Integration**

Integrate with PUBLIQ's **Accounting Suite** for complete financial management. Bundle to process purchase orders and monitor multiple years of data, including encumbrances, grants, and miscellaneous receipts.

# Services

## Imaging Documentation

Scan, import, and securely store images of documents without compromising customer privacy. Attach images to customer accounts, third parties, meter records, and owner records to easily access information.

## IT and Hardware Maintenance

When disaster strikes, we keep your devices running to ensure your business workflow is uninterrupted. We offer flexible options to host and manage data and software, ranging from on-site installation to cloud and enterprise.

## Remote Backup

We work closely with you to determine and meet your networking and hardware needs. Eliminate the responsibility and stress of maintaining your server, scheduling updates, and managing downtime due to equipment failure.
