

Manage Your Inventory with Ease and Accuracy

Complete Inventory Management

Our Inventory application makes maintaining inventory and equipment convenient. Control supplies, equipment locations, quantities, and more with the help of detailed tracking and Governmental Accounting Standards Board[®] (GASB) compliant reporting.

Efficiently Manage Inventory

Maintain accurate inventory records and manage totals. Track inventory quickly using barcode technology and compile complete item history. Keep track of on-hand, added, and removed item totals to simplify audits. Plan for current and future needs by managing reorder thresholds and quantities and calculating average item costs.

A key benefit is the ability to run reports at any moment on any given day. We did not have that ability with our old software.

Interfaces & Integration

Seamless Software Integration

Integrate with other PUBLIQ applications for continuous data sharing. Bundle with:

- **Accounting Suite** to eliminate duplicate data entry by automatically adding items to inventory during purchase order processing.
- **Utility Billing** to handle every aspect of management for water, gas, and electric utilities of any size.

Services

Image Documentation

Scan, import, and securely store images of documents without compromising customer privacy. Attach images to customer accounts, third parties, meter records, and owner records to easily access information.

IT and Hardware Maintenance

When disaster strikes, we keep your devices running to ensure your business workflow is uninterrupted. We offer flexible options to host and manage data and software, ranging from on-site installation to cloud and enterprise.

Remote Backup

We work closely with you to determine and meet your networking and hardware needs. Eliminate the responsibility and stress of maintaining your server, scheduling updates, and managing downtime due to equipment failure.
