

Tax Collections

Collect your city's property taxes with PUBLIQ™ Software's Municipal Tax application. By creating a complete tax file, compiled from county records, PUBLIQ provides your agency with information to accurately process tax collections. Municipal Tax integrates with our Accounting Suite and Centralized Collections applications to automatically build general ledger entries and give tax payers the convenience of looking up and paying their tax notices in person, online, or over the phone.

SIMPLE TRACKING AND COLLECTING

Track and maintain data to ensure your collection process is uncomplicated and accurate.

- Stay up to date on the who, what, and when of the collections process – who paid, how much was paid, and when the payment was collected
- Track unpaid taxes and adjustments, issue new tax records, accept payments, and view transaction history
- Locate records in multiple ways, including location, name, account number, and more
- Maintain account numbers and map numbers for individual parcels
- Ensure your citizens' payments are up to date by systematically enforcing the payment of the oldest tax bill first
- Print and track past-due notices
- Provide necessary information for tax sales
- Utilize custom reports and data exports to view and provide pertinent information
